

SSO PROGRAM STATUS – APRIL 2013

Program Highlights

- 109 active projects
 - 37 projects completed (nearly \$250M construction value)
 - 40 pump stations have been upgraded
 - Over 10,000 manholes have been inspected, rehabilitated, or replaced
 - Over 38 miles of force main improvements
 - Over 450 miles of gravity main improvements
 - 37 projects under construction (nearly \$600M construction value)
 - 35 projects in design (over \$320M construction value)
- Over 350 different Program partners

Looking Ahead

The following projects are expected to advertise for construction bids during **2nd quarter 2013**. As projects are advertised for construction bid, they will be posted on the SSO Program calendar at www.brprojects.com.

Little Farms Sewer Area Upgrades (11-FM-MS-036A AND 11-PS-MS-035A): The project involves the installation of approximately 600 linear feet (lf) of force main ranging in diameter from 10" to 15," manholes, 400 lf of jack and bored pipe from 10" to 15" in diameter, and 160 lf of 12" diameter horizontal directional drilling. The project also involves the installation of a new triplex pumping station as well as the removal of two existing pump stations and associated appurtenances and improvements. Expected to advertise April 2013.

Nicholson Drive–Highland Road–Perkins Road Phase B (09-FM-MS-047B): The project includes upsizing force and gravity mains in an area that extends north to the intersection of Jefferson Hwy and Tiger Bend Rd and south to the SWWTP. Expected to readvertise April 2013.

O'Neal Lane Pipeline Projects–Group A (10-FM-MS-0008A): The project involves upsizing gravity main in an area that extends north of Florida Blvd to the Monticello Subdivision and continues south to include the Shenandoah and Old Jefferson areas. This project consists of upsizing approximately 54,000 lf of diameters ranging from 6 to 42 inch force main pipe and approximately 12,050 LF of various diameters of gravity sewer. Expected to advertise April 2013.

Airline Highway–Goodwood Blvd Comprehensive Rehabilitation Project (Phase 2) (11-AR-MS-0028): The project includes the rehabilitation of the sewer collection system in the area of Airline Highway between Choctaw Street and I-10 and is expected to advertise late May/early June 2013.

O'Neal Lane Pump Stations Projects–Group A (10-PS-MS-0050): Phase A project involves the upgrade of 17 pump stations ranging in size from 500 gallons per minute (gpm) to 22,000 gpm. The upgrades will work in conjunction with force main upgrades in the O'Neal Lane Pipeline Group A project to alleviate chronic SSOs at and near these pump stations. Expected to advertise June 2013.

Government Street–South Acadian Thruway Capacity Improvement Project (09-GS-MS-0043): This project includes the upgrade of gravity sewers near Government St between Foster St and Acadian Thwy to alleviate SSOs in the vicinity and consists of upsizing approximately 9,800 lf of diameters ranging from 12 to 27 inch gravity sewer. Expected to readvertise June 2013.

South Boulevard–St. Joseph Street, Phase B Capacity Improvement Project (07-PS-BD-048A): This project consists of approximately 1,400 lf of new force main ranging from 24 to 30 inch diameter along River Rd. It also includes approximately 2,500 lf of new 36 inch diameter gravity sewer pipe along South Blvd. Expected to advertise June 2013.

Antioch Road–Chadsford Drive Comprehensive Rehabilitation Project (City-Parish #TBD): The project includes the rehabilitation of the sewer collection system in the area of George O'Neal St between Jones Creek Blvd and the parish boundary and is expected to advertise June 2013.
