

# RMAP1 – Kleinpeter Area Upgrades Remedial Action Plan 1 Project

City-Parish #03-RMP-S14 (PDP # 03-RMP-S14)

Project Start: **November 2006**  
 Advertise: **May 2007**  
 Project End: **May 2009**

**Project is 100% Complete**

This project is located in the Santa Maria Golf Club/Country Club of Louisiana area near Interstate 10 and Highland Road. Capacity upgrades were made to PS382 and approximately 2,000 linear feet of new 6-inch forcemain was constructed. By increasing the forcemain size from 4 to 6 inches, this pump station will have approximately 40% increase in pumping capacity.

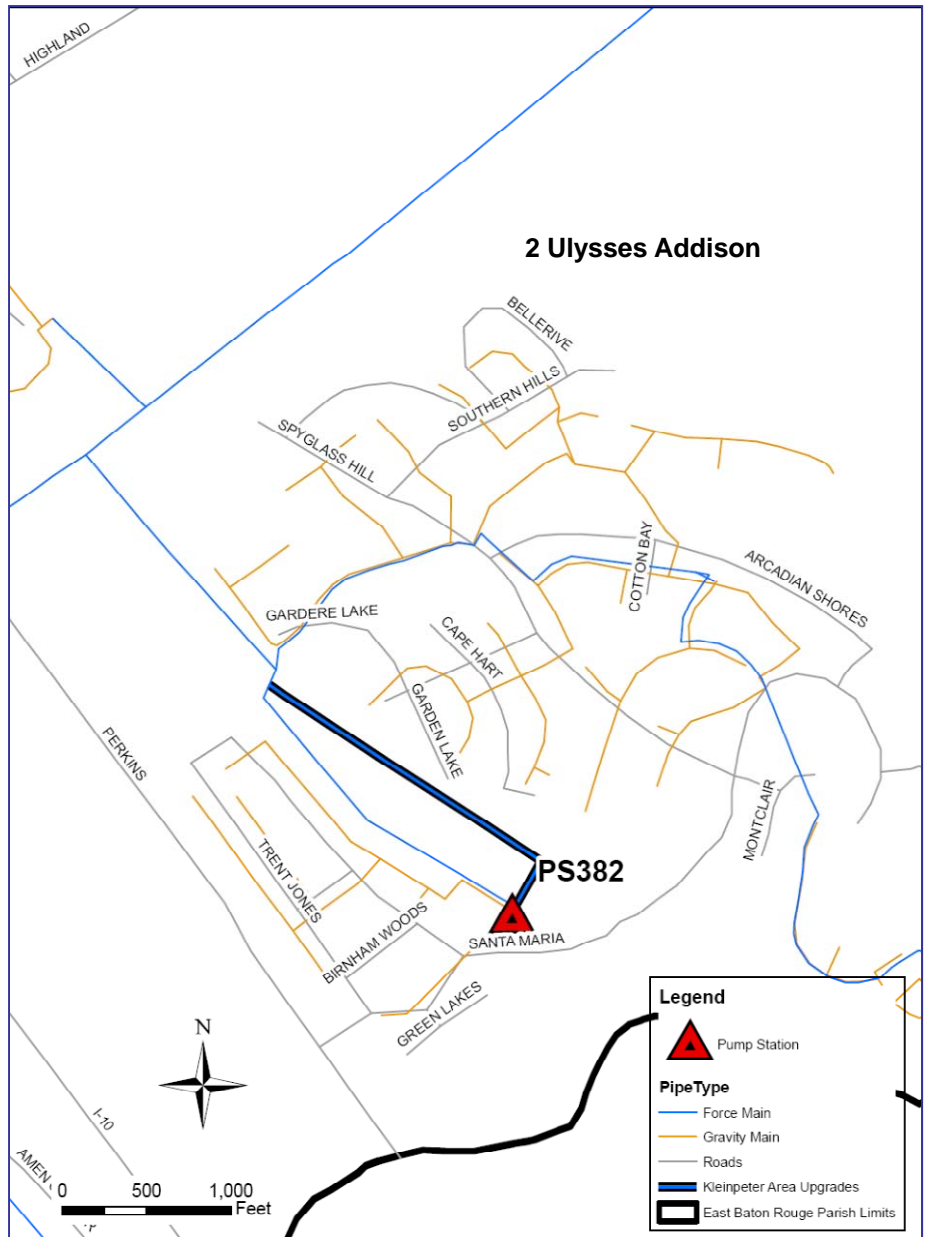

The Kleinpeter Area Upgrade project consists of 2000 feet of forcemain upgrades.

Near PS382, trucks are used to ensure proper care is taken by the contractor when by-pass pumping started on the existing lift station.

A new submersible pump, still wrapped from the factory, is ready for installation into the newly resurfaced, rehabilitated wet well.

## RMAP1 – Kleinpeter Area Upgrades Project Facts

### FORCEMAIN IMPROVEMENTS:

- 6-inch forcemain; 2000 feet

### PUMP STATION UPGRADES

- PS382 – Capacity Upgrades

### Design Consultant:

Monroe & Corie

### Construction Contractor:

Allen & LeBlanc

**Estimated Construction Cost: \$324,024.00.**
