

Jefferson Hwy - Hoo Shoo Too Rd Area Rehabilitation Project

City-Parish #07-AR-US-0049

Advertise for Bids: **3rd Quarter 2008**
 Project End: **3rd Quarter 2009**

Rehabilitation of the sewer collection system is a comprehensive physical process that begins with cleaning and inspection of sewer pipes and manholes. Typical rehabilitation repairs include pipe and manhole replacement and trenchless technologies that minimize above ground disturbances, such as cured-in-place pipe liners.

One of the first steps in rehabilitation includes a physical inspection of manholes and pipes to identify blockages.

Simply cleaning the pipes and manholes in preparation for the physical inspection removes blockages, debris and roots.

Jefferson Hwy - Hoo Shoo Too Rd Area Rehabilitation Project Project Facts

For this project:

- Approximately 114,796 linear feet of pipeline were inspected and rehabilitated
- Approximately 543 manholes were rehabilitated or replaced
