

Pump Station 42 Force Main (Phase 2)

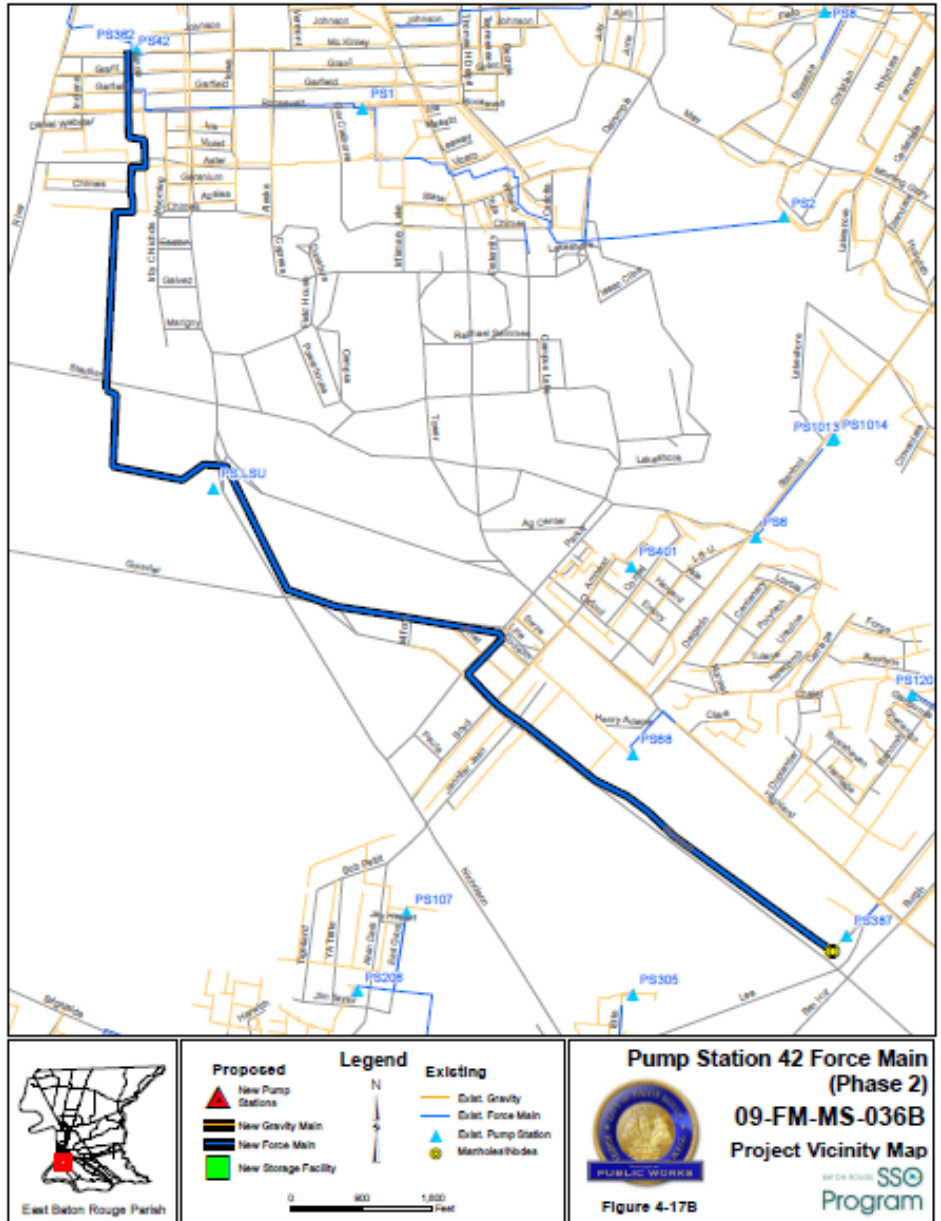

City-Parish #09-FM-MS-036B

Advertise for Bids: **4th Quarter 2011**
 Project End: **May 2014**

This project includes the design and construction of the force main to convey flow from PS 42 FM to the South WWTP. Once complete, flows will be redirected within the Central Basin to the South WWTP and accommodate upgrades within the South Basin following completion of construction of the South WWTP.

Design of the Central Consolidated PS42FM project started in November 2008.
