

Zachary Area Transmission Network Improvements Capacity Improvement Project Phase 5

City-Parish #06-WC-IF-014E

Project Start: **1st Quarter 2013**
 Advertisement for Bid: **1st Quarter 2014**
 Project End: **3rd Quarter 2015**

This project addresses inadequate capacity in the Baker/Zachary contributing area and to divert flow from the Zachary contributing area around the proposed Comite Diversion Canal to the NWWTP. Phase 5 includes constructing a new pump station in the northeast corner of the Cooper Mill Golf Community.

Design of the phases 1, 2, 3, and 4 of the Zachary Area Network Transmission projects started in March 2008.

Over 100,000 linear feet of force main will be constructed in Phases 1 through 4.

Zachary Area Transmission Network Improvements Phase 5 Project Facts

PUMP STATION IMPROVEMENT:
 • 1 pump station, 3,380 gallons per minute peak wet weather flow

Design Consultant:
 SJB Group/Owen & White

Construction Contractor:
 TBD

Construction Cost: \$2.0 M
