

Highland Rd - Washington St Area Rehabilitation Project

City-Parish #11-AR-MS-0022

Advertise for Bids: **3rd Quarter 2011**
 Project End: **3rd Quarter 2013**

Rehabilitation of the sewer collection system is a comprehensive physical process that begins with cleaning and inspection of sewer pipes and manholes. Typical rehabilitation repairs include pipe and manhole replacement and trenchless technologies that minimize above ground disturbances, such as cured-in-place pipe liners.

One of the first steps in rehabilitation includes a physical inspection of manholes and pipes to identify blockages.

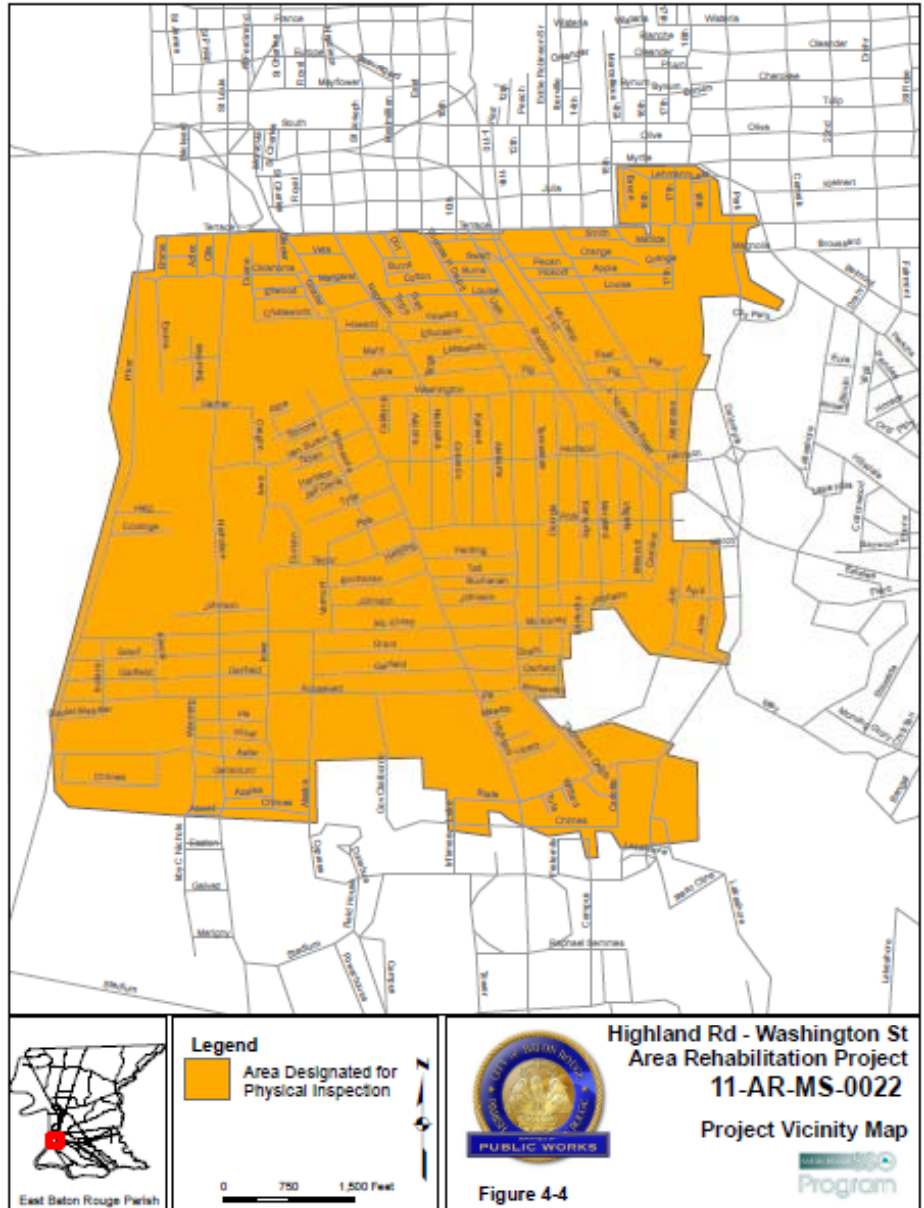

Before

Simply cleaning the pipes and manholes in preparation for the physical inspection removes blockages, debris and roots.

After

Highland Rd - Washington St Area Rehabilitation Project Facts

For this project:

- Approximately 215,207 linear feet of pipeline were inspected and rehabilitated
- Approximately 926 manholes were rehabilitated or replaced
