

# Kenilworth Blvd - Boone Dr Area Rehabilitation Project

City-Parish #09-AR-BD-0014

Advertise for Bids: **4<sup>th</sup> Quarter 2010**  
 Project End: **3<sup>rd</sup> Quarter 2012**

Rehabilitation of the sewer collection system is a comprehensive physical process that begins with cleaning and inspection of sewer pipes and manholes. Typical rehabilitation repairs include pipe and manhole replacement and trenchless technologies that minimize above ground disturbances, such as cured-in-place pipe liners.

One of the first steps in rehabilitation includes a physical inspection of manholes and pipes to identify blockages.

Simply cleaning the pipes and manholes in preparation for the physical inspection removes blockages, debris and roots.
