

# Plank Rd Pump Stations Improvements

City-Parish #11-PS-MS-0024

Advertise for Bids: **4<sup>th</sup> Quarter 2013**  
 Anticipated Project End: **4<sup>th</sup> Quarter 2015**

This project includes the replacement of five pump stations and the upgrade of three pump stations. These will work in conjunction with the force main and gravity sewer upgrades in the North Gravity Basin to alleviate chronic SSOs in the basins upstream of the pump stations.

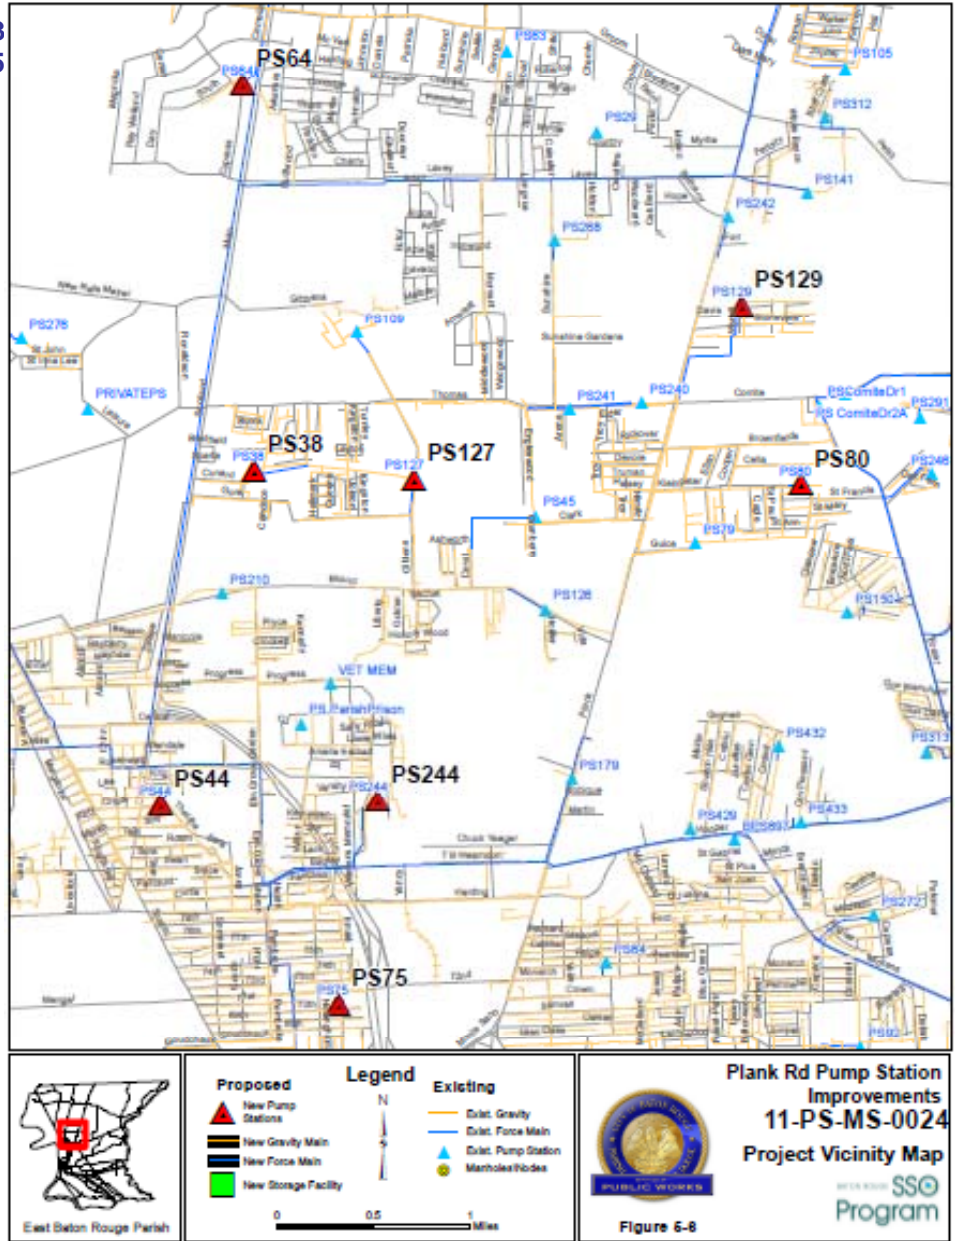

Collection system pipe sizes range from less than one foot to more than six feet in diameter.

Flow measurements are taken throughout the collection system to determine the correct pipeline size.

New submersible pumps wrapped from the factory and ready for installation into wet wells.

## Plank Rd Pump Stations Improvements Facts

### PUMP STATION UPGRADES

- 8 pump stations, 280-11,200 gallons per minute peak wet weather flow

### Design Consultant:

Arcadis, US., Inc.
