

# Scenic Hwy - Spanish Town Rd Area Rehabilitation Project (Phase 1)

City-Parish #12-AR-MS-0039

Advertise for Bids: **3<sup>rd</sup> Quarter 2013**

Anticipated Project End: **1<sup>st</sup> Quarter 2015**

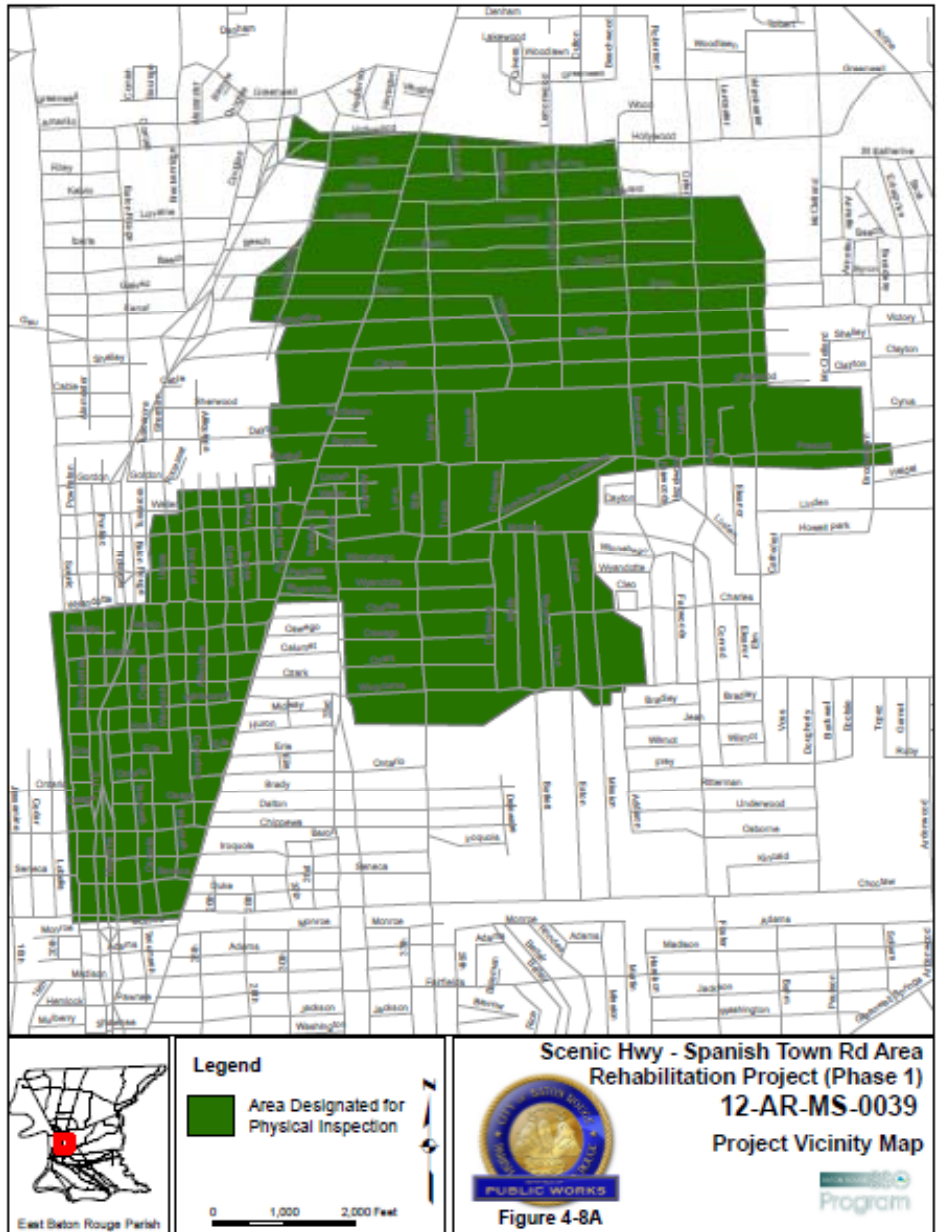

Rehabilitation of the sewer collection system is a comprehensive physical process that begins with cleaning and inspection of sewer pipes and manholes. Typical rehabilitation repairs include pipe and manhole replacement and trenchless technologies that minimize above ground disturbances, such as cured-in-place pipe liners.

One of the first steps in rehabilitation includes a physical inspection of manholes and pipes to identify blockages.

Simply cleaning the pipes and manholes in preparation for the physical inspection removes blockages, debris and roots.

## Scenic Hwy - Spanish Town Rd Area Rehabilitation Project (Phase 1) Facts

For this project:

- Approximately 228,821 linear feet of pipeline to be inspected and rehabilitated
- Approximately 842 manholes to be rehabilitated or replaced
