

# Stanford Rd - Morning Glory Rd Area Rehabilitation Project

City-Parish # 10-AR-BD-0045

Advertisement for Bids: **3<sup>rd</sup> Quarter 2011**  
 Project End: **4<sup>th</sup> Quarter 2012**

Rehabilitation of the sewer collection system is a comprehensive physical process that begins with cleaning and inspection of sewer pipes and manholes. Typical rehabilitation repairs include pipe and manhole replacement and trenchless technologies that minimize above ground disturbances, such as cured-in-place pipe liners.

One of the first steps in rehabilitation includes a physical inspection of manholes and pipes to identify blockages.

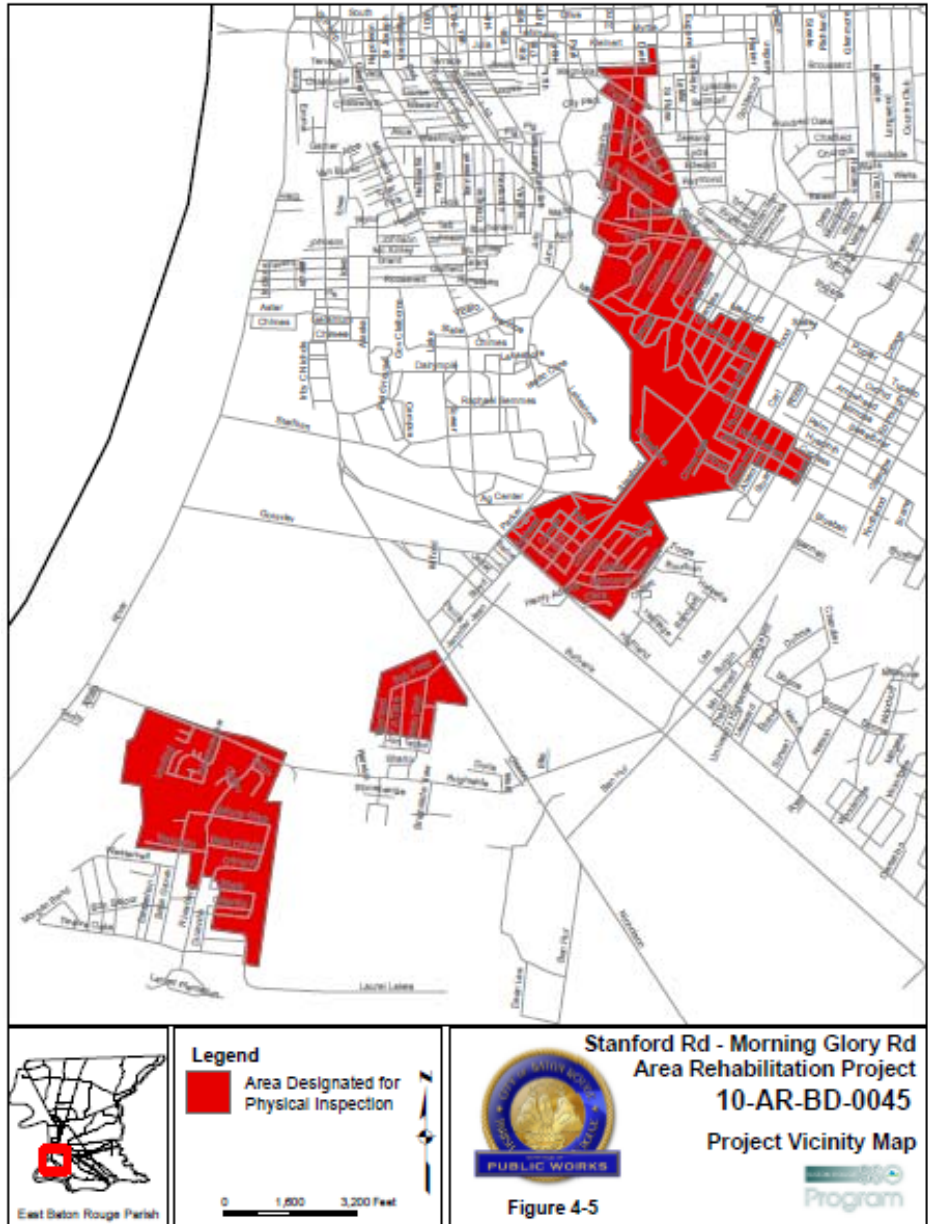

**Before**

Simply cleaning the pipes and manholes in preparation for the physical inspection removes blockages, debris and roots.

**After**

## Stanford Rd - Morning Glory Rd Area Rehabilitation Project Facts

For this project:

- Approximately 161,616 linear feet of pipeline were inspected and rehabilitated
- Approximately 688 manholes were rehabilitated or replaced
