

Staring Ln - Boone Dr Area Rehabilitation Project

City-Parish #08-AR-UF-0004

Advertisement for Bids: **1st Quarter 2009**
Project End: **2nd Quarter 2010**

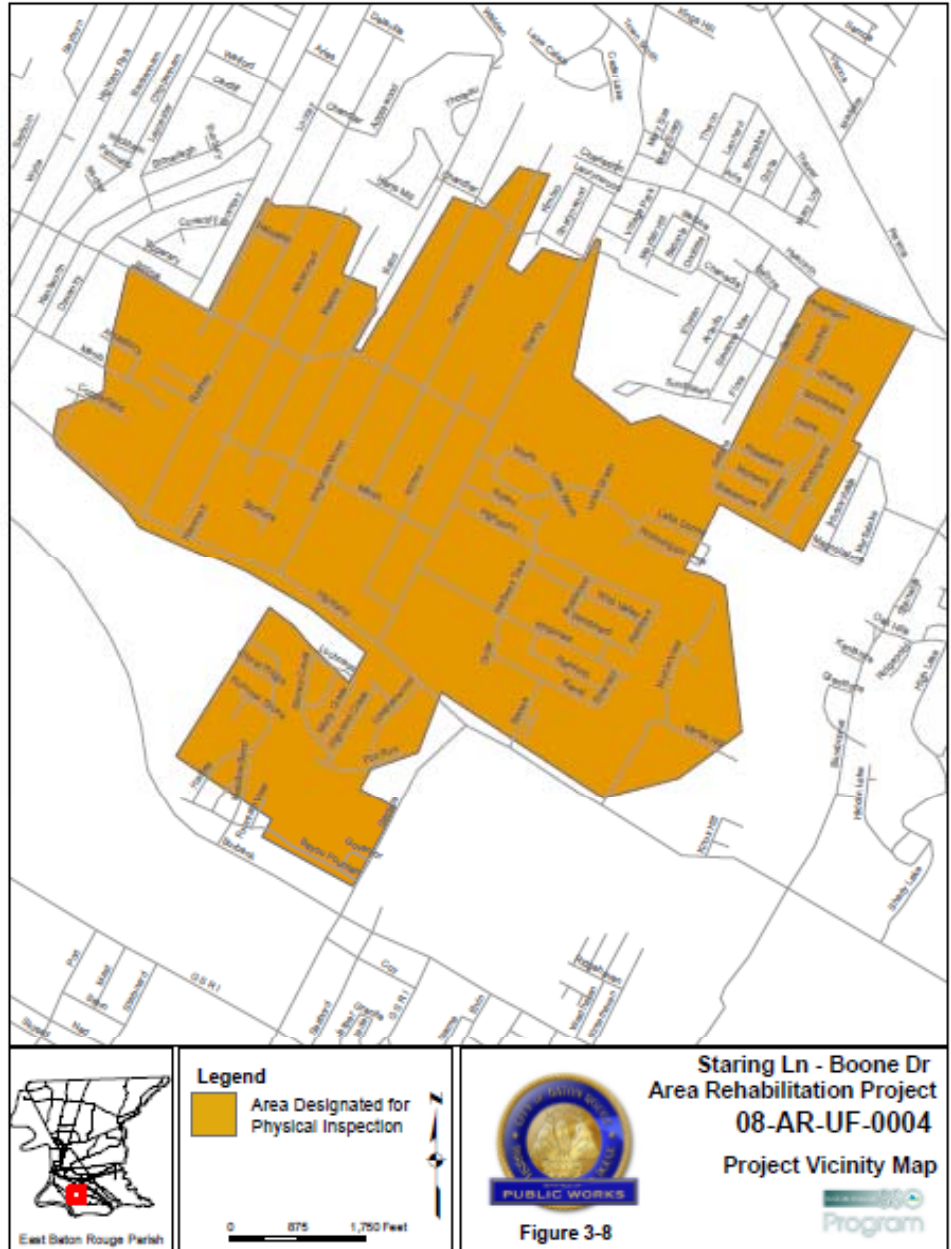

Rehabilitation of the sewer collection system is a comprehensive physical process that begins with cleaning and inspection of sewer pipes and manholes. Typical rehabilitation repairs include pipe and manhole replacement and trenchless technologies that minimize above ground disturbances, such as cured-in-place pipe liners.

One of the first steps in rehabilitation includes a physical inspection of manholes and pipes to identify blockages.

Simply cleaning the pipes and manholes in preparation for the physical inspection removes blockages, debris and roots.

Staring Lane-Boone Drive Project Facts

For this project:

- Approximately 139,050 linear feet of pipeline were inspected and rehabilitated
- Approximately 665 manholes were rehabilitated or replaced
