

# Zachary Area Transmission Network Improvements Capacity Improvement Project (Phase 4)

City-Parish #10-FM-IF-0005

Advertise for Bids: **3<sup>rd</sup> Quarter 2010**  
Project End: **4<sup>th</sup> Quarter 2012**

This project address inadequate capacity in the Baker/Zachary contributing area and to divert flow from the Zachary contributing area around the proposed Comite Diversion Canal to the NWWTP. Phase 4 includes the installation of force main along the Old Baker Road, Hwy 964 and north and west of the proposed Old Baker Road pump station.

Design of the Zachary Area Network Transmission project started in March 2008.

Approximately 38,160 linear feet of 14–30 inch diameter force main will be constructed in Phase 4 of the project.

A total of 38,160 linear feet of force main will be constructed in the project area.
